

WADERS *sizing chart*

For best fit please try the product on before purchasing

1. The inseam is the measurement taken from the crotch to the floor with no shoes on.
2. The outseam is the measurement taken from the armpit (arms extended) to the floor with no shoes on.

It is important to have the right size of waders to get their maximum performance.

We recommend trying on at least three sizes of waders before choosing.

Standard		X5	S	M	L	XL	XXL
	Chest ø cm	107	112	117	127	132	140
